**JUNE 2008—SMILE**

Its delicately contoured seat and back, whimsical lines and subtly molded details belie the rugged utility of the Smile chair, new from Kansas City-based Fixtures Furniture. Designed by Brian Kane, Smile is a durable tubular stack chair available in 17 opaque and 9 translucent thermoplastic finishes and 10 frame finishes. A consistent focus on balancing comfort, aesthetics, strength and cost informed the process throughout development of this chair, which was developed in collaboration with Fixtures' engineering team.

Planned for a fall, 2008 shipment, Smile represents yet another addition to the 60-year old company's stable of well designed, well priced, durable chairs and tables for dining, meeting, training and waiting applications.

Fixtures Furniture offers a simple line of tables and chairs with uncomplicated looks and the versatility to flex in multiple applications. Fixtures Furniture offers colors and materials that fit any environment, neutral or bright, with a unique set of additive elements.
